

Suggested Research Questions

Malaria KAP & Laboratory

- 1 What are the demographic characteristics of participants?
- 2 What environmental/household practices are reported?
- 3 How are the recorded malaria-related laboratory results distributed?
- 4 Are selected KAP factors associated with recorded malaria-related outcomes?

Diabetes & Glucose

- 1 What is the distribution of diabetes duration among participants?
- 2 How do fasting and non-fasting glucose measurements compare?
- 3 What is the distribution of capillary and venous glucose values?
- 4 Are glucose measurements associated with duration of diabetes or fasting status?

Bacterial Vaginosis

- 1 What is the prevalence of bacterial vaginosis in the study population?
- 2 What are the demographic characteristics of participants?
- 3 Are selected behavioural/reproductive factors associated with bacterial vaginosis?
- 4 Are laboratory/clinical indicators associated with bacterial vaginosis?

Need Help With Your Research or Data Analysis?

Want to go beyond practising with the datasets?

Ets Analytics provides support in:

- Excel/SPSS/Stata/R/Python data analysis and Mentorship
- Statistical analysis and interpretation
- Research methodology
- Data cleaning and preparation
- Monitoring & Evaluation
- Research project support
- Data analysis guidance for students and researchers
